(54) Title: SPECIALISED MOBILE TERMINAL

(57) Abstract: The invention refers to a specialised mobile terminal (1) intended to be localised by means of a suitable equipped telecommunications network (2). The mobile device (1) only implements the functions required for location definition and can be activated both remotely and possibly locally by the user of the device (1). The device (1) may also comprise a display to view the localisation data determined by means of the network.
